Description

Create and configure a cache region to store temporary the result of the query that retrieve some information about a dossier. Store the result in the cache during 2 hours before refreshing them when next requesting the data.

Comments

Jorge de Juan Gonzalez added a comment - 24/Jan/18 5:29 PM

Two caches created and configured :

1. the default one : caches the data for 30 seconds
2. the "static" one : caches the data for 2 hours

Description

In the flow chart in [EDOS-5112](#), there are two blocks present that have not yet been implemented.

For either 2nd examiner or chairman:

IF we don't find a match based on SLAVE

AND IF we do find a match based on MASTER

THEN we need to reset the SLAVE values by overwriting them with the master values

TO DO:

1. Create a spring service taking 2 parameters on input: directorate and role
2. Call this service in case the above happens

Query:

```
UPDATE AM_ALLOCATION_WEIGHTING
SET SLAVEWEIGHTINGCHAIR = MASTERWEIGHTINGCHAIR
WHERE DIRECTORATE = {directorate}
```

Important notes:

- the above example is for chairman, when role = 2nd examiner, use MASTERWEIGHTING2NDEXAMINER and SLAVEWEIGHTING2NDEXAMINER
- DIRECTORATE is not available in AM_ALLOCATION_WEIGHTING, a sub-select will be needed

Comments

Deepan Vadivel added a comment - 05/Feb/18 6:40 AM

```
<#if chairmanLeadID?? || examinerLeadID??>
DECLARE @techfieldin VARCHAR(255)
DECLARE @class VARCHAR(255)

Description

When the service assignexaminersandchairman is first called by the front-end, the whole form needs to be populated.

This is the case when we get the following body on input:

```
{ "objects": { "Assign_examiners_and_stockmanager": { "BatchAllocation": "true", "Autosuggestion": "true" } } }
```

In that case, we need to do the following:

1. get all three examiners (SE_PROPERTIES > PROPOSEDFIRSTEXAMINER, EXAMINER1, EXAMINER2, CHAIRMAN)
2. get their directorates
3. if any of the 3 directorates is different from the one of the dossier, advanced allocation needs to be set to TRUE
4. get list of eligible examiners/chairman based on the selected/default directorate

5. if advanced allocation is set to true, the form needs to be filled accordingly (list of directorates)

Comments

Jorge de Juan Gonzalez added a comment - 31/Jan/18 4:11 PM

Two subtasks to develop in this task:

- New query and DAO: Get the directorates of the examiners retrieved from the table SE_PROPERTIES > PROPOSEDFIRSTEXAMINER, EXAMINER1, EXAMINER2, CHAIRMAN.
(Explication of the field "PROPOSEDFIRSTEXAMINER": when an application comes in, the system already proposes a first examiner to the stock managers. In that case, that person should already be present as EXAMINER1, in case EXAMINER1 is still null).
- Adaptation of the existing Allocation Service.
